**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/24/2004 has been entered.

2. The indicated allowability of claims 1-6 is withdrawn in view of the newly discovered reference(s) to Nakao (US Patent No. 6,331,846). Rejections based on the newly cited reference(s) follow.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 4, 7 and 9 are rejected under 35 U.S.C. 102(e) as being anticipated by Nakao (US Patent No. 6,331,846).

As to claims 1, 4, 7, 9, Nakao discloses a driving apparatus for a liquid crystal display apparatus, comprising: first and second amplifier circuits (2801, 2802) that amplify a non-inverted input signal or an inverted input signal, a first change over circuit (2805, 2806, Fig. 27) that selectively switches and outputs the non-inverted and inverted input signals to be outputted

Art Unit: 2674

to the first and second amplifier circuits; a second changeover circuit that selectively switches and outputs output signals of the respective first and second amplifier circuits to pixels provided in a matrix manner in accordance with an alternation signal; and a changeover circuit (2815, 2813, Fig. 27) that controls switching of the first and second changeover circuits so that a polarity of an offset voltage to be applied to the pixel by the first and second changeover circuits is changed for every predetermined number of frame and the offset voltage is canceled by frames whose number is twice as many as the predetermined number of frames (see Fig. 24).

***Allowable Subject Matter***

5. Claims 2, 3, 5, 6, 8 and 1014 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 15-20 are allowed.
